PROFILE

As an enthusiastic Frontend Developer, I am excited to work with cross-functional teams to deliver innovative and efficient frontend solutions while continuously expanding my skill set in a dynamic tech environment.

WORK EXPERIENCE

Front-End Developer

Avanza Innovations . Full Time Sept 2022 – Present

- **National eKYC** - Contributed to the development and implementation of a pioneering national eKYC (Electronic Know Your Customer) blockchain-based project, leveraging the Hyperledger framework. Enhanced identity verification processes, improved data security, and streamlined access to personal information for citizens and organizations.

- **Orion Metaverse** - : I have extensive experience working on Orion Meta, an enterprise metaverse application, where I played a key role in developing and enhancing both the backoffice and agent dashboard applications. These applications are pivotal components of the Orion Meta. ecosystem, facilitating seamless scene creation and enabling interactions with customers and users.

- **The Convo** - : As the developer for The Convo Invest, I created a sleek, user-friendly investment platform. By leveraging cutting-edge frontend technologies, I ensured a responsive interface and seamless performance. Collaborating with the design team, I transformed creative concepts into interactive features, delivering a dynamic and secure platform for modern investors.

Front-End Developer

Sartim Solution. Full-time Jan 2022 - Aug 2022

- **Zubaidas.Store** - : As the developer for Zubaida's Store, I built a dynamic e-commerce website using WordPress. I focused on creating a seamless shopping experience with an intuitive interface and responsive design, ensuring a user-friendly and efficient site.
